Dear Water User:

This year the Jordan Valley Water Conservancy District (JVWCD) received the water distribution assessment associated with water diverted at the Jordan Narrows Pumping Station. In discussing this assessment with JVWCD, we determined it should be divided among the irrigation companies according to the number of water shares owned by JVWCD that are diverted at the pumping station. JVWCD reports the 2007 monthly deliveries by water rights as follows:

2008 Assessment Adjustments					
Utah Lake/Jordan River water pumped via JVWCD Pumping Station in 2007

1256.65	59-2721 (a15005)	102374	Utah Lake Distributing Co.	0.1376	\$1,632.71

9130.37			Total	1	\$11,862.70

These assessments are based on the water pumped by JVWCD as reported by the commissioner, are pro-rated based on deliveries outlined above, and were added to the 2008 assessments to the respective companies. They reflect each company's portion of the distribution system costs. If you have questions please contact me at (801) 538-7469.
